INTERVIEW SUMMARY RECORD

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

On March 31, 2004, having ascertained that Examiner David Esplin was no longer with the U.S.P.T.O., Applicants' attorney, Carl E. Moore, Jr., conducted a telephonic interview with Examiner Alan A. Mathews. Newly proposed claims 40 and 41 were faxed to the Examiner and discussed. Proposed claim 40 combined the subject matter in original claims 1 and 4. Proposed claim 41 combined the subject matter in original claims 18 and 22. Applicants asserted that neither the prior art of Naya (U.S. Patent No. 5,875,032) nor Hoppe et al. (U.S. Patent No. 6,570,657) discloses positioning a photo-detector such that its differential signal is near zero and then detecting changes in the intensity distribution

corresponding to plasmon resonance angular shift. Applicants further asserted that neither Naya nor Hoppe discloses amplifying the differential signal, as recited by the proposed claims 40 and 41.

Examiner Mathews neither agreed nor disagreed with the proposed claims.

It was agreed that Applicants would set forth the arguments that were discussed with the proposed amendments in their written response to the Final Office Action of January 28, 2004.

Respectfully submitted,  
MARSHALL, GERSTEIN & BORUN LLP  
6300 Sears Tower
